

Vinícius Rossmann Nunes

Vila Velha, ES - Brazil
viniciusrossmann@gmail.com

PROFESSIONAL OBJECTIVE

To work in development or technical leadership positions that involve architectural decision-making, solving complex problems, and delivering scalable, business-driven solutions. I aim to contribute to high-impact, challenging projects where cross-functional collaboration and strategic vision are valued, and where I can continue evolving as a technical reference and partner in building robust and sustainable systems.

PROFESSIONAL SUMMARY

Tech lead and software developer with solid experience throughout the entire software lifecycle — from refinement to cloud deployment. Focused on performance, scalability, and delivering robust solutions for critical environments. Strong expertise in .NET, Angular, cloud-based architectures (AWS), event-driven systems (Kafka), relational and non-relational databases, CI/CD pipelines, and monitoring tools.

EDUCATION

- **Postgraduate in Software Architecture**

Institution: FIAP
2025 - In progress

- **Bachelor's Degree in Computer Science**

Institution: FAESA
2020 - 2023

PROFESSIONAL EXPERIENCE

- **Grupo Autoglass**, Vila Velha/ES - Hybrid

Position: Software Developer / Tech Lead

2022 - Present

Key responsibilities:

- Technical leadership in squads focused on financial and tax-related solutions, ensuring scalability, performance, and reliability.
- Web application development using .NET, Angular, and both relational and non-relational databases.
- Active participation in the design of critical system architectures, especially for payment processing, ERP integrations, tax calculation, and invoice issuance (NFe).
- Experience with AWS cloud services (ECS, SQS, S3, Cognito, API Gateway, among others) and Kafka for asynchronous processing, service communication, and resilience in distributed environments.
- Agile delivery process using Jira, GitFlow, Jenkins, and other CI/CD tools.

- Monitoring and observability with Grafana and New Relic.

- **HM Tecnologia e Sistemas**, Vitória/ES - Remote

Position: Full Stack Developer

2020 – 2022

Key responsibilities:

- Development and maintenance of custom web systems for small and medium-sized clients.
- Implementation of solutions for electronic invoice issuance and queries, and development of systems for automobile dealerships.
- Work with NodeJS, .NET, React, and MongoDB.

CERTIFICATIONS AND COMPLEMENTARY COURSES

- **AWS Certified Cloud Practitioner**, AWS (2025)
- **Kubernetes Management**, FIAP - 70 hours (2025)
- **Software Architecture Training**, FIAP - 100 hours (2024)
- **Domain-Driven Design**, Full Cycle - 6 hours (2024)
- **Hexagonal Architecture**, Full Cycle - 18 hours (2024)

SKILLS AND COMPETENCIES

- **Languages and Frameworks:** .NET, NodeJS, Angular, React
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB, Redis
- **Cloud and DevOps:** AWS (ECS, SQS, Lambda, AuroraDB, S3, Cognito, API Gateway, feature flags), Docker, Jenkins, Azure DevOps, Git, GitFlow
- **Messaging and Architecture:** Kafka, REST APIs, distributed systems, DDD (Domain-Driven Design), microservices
- **Monitoring and Observability:** Grafana, Elasticsearch, New Relic
- **Project and Collaboration Tools:** Jira, Confluence
- **Soft Skills:** Technical decision-making, strategic vision, sense of urgency, clear and objective communication, teamwork in multidisciplinary environments
